

Professional Summary

Full-Stack Software Engineer with 4+ years of experience building scalable SaaS applications using TypeScript, Node.js, and React. Strong expertise in designing APIs, implementing business logic, and delivering end-to-end product features. Passionate about building high-quality, maintainable software with a strong focus on user experience, performance, and real-world impact.

Technical Skills

Languages: JavaScript, TypeScript
Frontend: React, HTML, CSS, Tailwind CSS(basic)
Backend: Node.js, NestJS, REST APIs
Web Services: REST APIs, API design and integration
Databases: SQL, PostgreSQL (basic)
Architecture: Modular systems, scalable applications, API-driven design
Testing: Playwright, End-to-End Testing, API Testing
DevOps: CI/CD pipelines (Azure), Docker
Tools: Git, GitHub, GitLab, Postman, VS Code

Professional Experience

Full Stack Software Developer Nov 2024 – Present
H2 Digital GmbH, Germany

- Designed and developed full-stack features using TypeScript, Node.js, and React.
- Built and maintained REST APIs and backend services to handle complex business logic.
- Developed reusable frontend components with a focus on performance and usability.
- Collaborated closely with product managers and designers to define and refine features.
- Improved system performance by 20% through optimization of backend services and APIs.
- Implemented CI/CD pipelines using Azure to automate testing and deployments.
- Developed end-to-end tests using Playwright to ensure product quality and stability.
- Participated in code reviews and contributed to improving code quality and team practices.

Working Student – Software Developer Nov 2022 – Oct 2024
CibusCell Technology GmbH, Germany

- Developed full-stack features using React, TypeScript, and NestJS in an agile environment.
- Designed and integrated REST APIs for data-driven applications.
- Built responsive user interfaces and improved overall user experience.
- Improved application performance by 20–30% through frontend and backend optimization.
- Collaborated in cross-functional teams to deliver product features iteratively.

Systems Engineer Jul 2019 – Oct 2021
Tata Consultancy Services, India

- Developed web applications using React and Node.js.
- Built REST APIs and improved backend performance.
- Automated workflows using Python to improve efficiency.
- Worked in agile teams and contributed to continuous improvement processes.

Projects

Automated API Testing Framework with CI/CD Integration (Master Thesis)

- Developed a scalable API testing framework integrated into CI/CD pipelines.
- Implemented dynamic API discovery using OpenAPI/Swagger.
- Built a frontend interface to visualize API responses and testing results.
- Focused on automation, scalability, and developer usability.

Education

MSc Computer Science	2021 – 2024
RPTU University Kaiserslautern-Landau, Germany	
Bachelor of Technology	2015 – 2019
APJ Abdul Kalam Technological University, India	

Languages

English (C1), German (A1)

Interests

SaaS platforms, sustainability, scalable systems, and building impactful software
